

fantasy_teams.py
remove_player_from_fantasy_team
line 142

With proper concurrency control, the second transaction should wait for the first to be completed, and see the team balance as \$100,000 instead of \$60,000, and when the team budget gets reimbursed it will include both players and would end up being \$170,000 instead of \$130,000.
